PLATINUM SURFACE
 PORCELAIN WALLPAPER „DROPS“ CONSISTS
 OF EIGHT TYPES OF COMPONENTS.

Think 3D!

Introducing a new vision for interior wallpaper by designer Daniel Pirsc. 3D porcelain components are a completely new solution. Reception areas, public spaces, interior walls ... choose from many options. 3D wallpaper is a flexible solution for any space, easy to install and highly variable. A new direction in interior design...

think 3D...!

You are co-autor of your interior

Daniel Pirsc founded his studio in 2005 with the concept of developing good ideas and resultant good products in close proximity. The studio is equipped with technology allowing production of top-grade products. We specialize in sophisticated and uncommon techniques.

Each product is made under the close supervision of the designer. We aim to merge state-of-the-art technology with good ideas that give birth to objects endowed with personality, soul and wit... Porcelain can be surprisingly different...

Material:

THE PORCELAIN IS GLOST-FIRED IN AN OXYGEN-FREE ENVIRONMENT, WHICH MAKES THE PRODUCT SNOW-WHITE. PRODUCTS ARE AVAILABLE IN SEVERAL DIFFERENT FINISHES.

Finish:

THE BASIC FINISH IS WHITE GLAZE. FURTHER DECORATIONS ARE ADDED WITH CERTIFIED CHEMICALS CONTAINING PRECIOUS METALS FIRED AT 780°C.

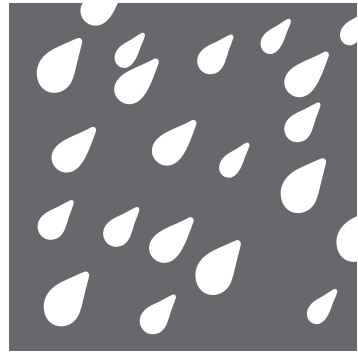

Installation:

INSTALLATION OF THE WALLPAPER COMPONENTS IS VERY SIMPLE. A SMOOTH AND WELL-PREPARED SURFACE IS REQUIRED. USE SCREWS, NAILS OR STEEL NAILS DEPENDING ON THE TYPE OF SURFACE. THEN YOU APPLY GLUE ON THE BACK SIDE OF THE COMPONENT TO SECURE IT IN PLACE. AND VOILA!

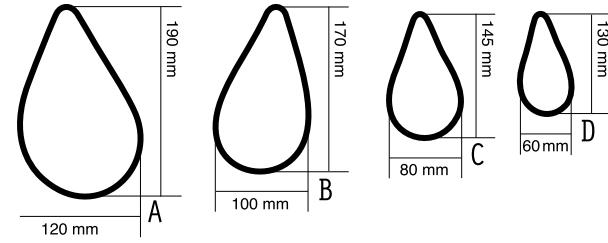

Maintenance:

WE RECOMMEND COMMON CLEANING PRODUCTS FOR MAINTENANCE OF GLASS SURFACES. DO NOT USE ABRASIVES.

rain...!

Porcelain wallpaper RAIN – finish
